

## Overview

Create, read, and update warehouse bin data.

## Allowed Requests

POST, PUT, GET

## Post Requests

### Required Fields

```
active
warehouse_id
bin
aisle
warehouse_bin_type_id
```

### Optional Fields

```
section
level
bin_location
separator
max_quantity
unit_of_measure_id
```

### Special Fields

active must be set to Active or InActive.

### Minimal Example

```
curl -X POST -H "Cookie: user=USER_TOKEN_FROM_LOGIN" -H "Content-Type: application/json" -d '{
    "active" : "Active",
    "warehouse_id" : "00000000-0000-0000-0000-000000000000",
    "bin" : "001",
    "aisle" : "A",
```

Last Updated Date : 03/01/2023

```
        "warehouse_bin_type_id" : "00000000-0000-0000-0000-000000000000",
    }' 'https://<company_name_here>.flowtrac.com/api/warehouse-bins
```

## Complete Example

```
curl -X POST -H "Cookie: user=USER_TOKEN_FROM_LOGIN" -H "Content-Type:
application/json" -d '{
    "active" : "Active",
    "warehouse_id" : "00000000-0000-0000-0000-000000000000",
    "bin" : "001",
    "aisle" : "A",
    "section" : "1",
    "level" : "B",
    "separator" : "-",
    "warehouse_bin_type_id" : "00000000-0000-0000-0000-000000000000",
    "max_quantity" : "100",
    "unit_of_measure_id" : "00000000-0000-0000-0000-000000000000"
}' 'https://<company_name_here>.flowtrac.com/api/warehouse-bins
```

## PUT Requests

### Non-nullable Columns

active  
warehouse\_id  
bin  
aisle  
warehouse\_bin\_type\_id  
system

### Nullable Columns

section  
level  
bin\_location  
separator  
max\_quantity  
unit\_of\_measure\_id

Last Updated Date : 03/01/2023

## Example

```
curl -X PUT -H "Cookie: user=USER_TOKEN_FROM_LOGIN" -H "Content-Type: application/json" -d '{
    "id" : "00000000-0000-0000-0000-000000000000",
    "active" : "InActive",
    "bin" : 002,
    "section" : "2"
}' 'https://<company_name_here>.flowtrac.com/api/contacts'
```

## Special Fields

active must be set to Active or InActive.

# GET Requests

## Filterable Columns

id	edited_by
active	edited_with
warehouse_id	unit_of_measure_id
bin	system
aisle	status
section	counted_audits
level	pending_audits
bin_location	order_number
separator	warehouse
warehouse_bin_type_id	type
max_quantity	include_in_available
created	include_in_onhand
created_by	include_in_transferable
created_with	include_in_receiveable
edited	

## Example

```
curl -X GET -H "Cookie: user=USER_TOKEN_FROM_LOGIN" -H "Content-Type: application/json"
'https://<company_name_here>.flowtrac.com/api/warehouse_bins?bin=001&aisle=A'
```
